halo Pontoon Boat Introduction

hālō

Pontoon Redefined

Introducing halo, the fun, vibrant pontoon boat with 360 degree viewing.

With 360-degree seating, movable backrests, and super comfortable suspension seating, Halo is designed for those who want more from their time on the water.

Our new Halo pontoon boat with rotomolded sidewalls is designed for boating enthusiasts seeking a blend of durability, comfort, and style. It's perfect for families and groups who enjoy leisurely cruises, water sports, or simply relaxing on the water. The rotomolded sidewalls offer enhanced protection against impacts and weather, making it ideal for those who value long-lasting performance and low maintenance. Whether you're hanging out with friends or taking the kids out for a day on the water, this boat caters to those who want a reliable, stylish, and enjoyable experience on the water.

halo Layout Key Features

halo Console

The all-new Halo Pontoon Boat features a sleek, modern console that's both stylish and functional. It comes equipped with all the gauges and switches you need, ensuring you're in full control on the water.

360-degree seating

Enjoy spacious comfort from every angle with the Quad Lounge—designed for unmatched relaxation and socializing on the water.

JBL Speakers

The Halo Pontoon Boat features a portable JBL speaker system that brings flexibility and exceptional sound quality to your boating experience. Easily detachable and wireless, these speakers allow you to take your music anywhere on the boat or even ashore.

Flexible Lounge backrest

Easily moveable from one location to another, this backrest adapts to your needs, allowing you to create the perfect lounging spot wherever you desire.

Construction Features

PolyForm Fencing and Furniture.

Beautifully designed.
Uncompromisingly safe and durable.

Built to endure

Polyethylene fencing offers exceptional durability and impact resistance, handling whatever life on the water throws your way. No dents, no cracks-just pure resilience.

Effortless maintenance

Cleaning is as simple as hosing off dirt and grime, while the durable PolyForm material stands up to harsh marine environments.

Sun-ready resilience

Crafted to resist UV rays, polyethylene ensures your boat stays vibrant and strong, season after season. No fading, no weakening-just lasting brilliance.

Designed your way

PolyForm's versatility allows for limitless design possibilities. Bold colors, sleek shapes-this is a boat that reflects your style.

Eco-friendly choice

Cruise with a clear conscience. PolyForm is recyclable, offering a greener alternative to traditional materials, for a future we can all enjoy.

Safe by design

Engineered for safety, our Polyform fencing's impact resistance keeps you protected on the water, reducing risks and enhancing peace of mind.

Construction

Thick Lifetime Decking

A thicker floor means a stronger pontoon. With $\frac{3}{4}$ " marine grade plywood, 7 layers, each individually treated, we can offer a Lifetime Warranty against rotting. Each seam is sealed with LockOut sealing adhesive and is lined up over a cross member for exceptional dryness.

Thick PolyForm Sidewalls

Engineered for safety, our Polyform fencing's impact resistance keeps you protected on the water, reducing risks and enhancing peace of mind.

Construction

Suspension Seating

This unique suspension seating is made up of a multi-directional stretch substructure backing, an added adhesive layer, followed by a heavy marine grade vinyl making up for a 50-ounce total vinyl covering, giving your passengers a smoother ride every time.

No-Rot Seat Bases

Made with thick roto-cast material means they they will never rot, no matter how wet they get. They even have integrated drainage channels so your gear stays drier as well.

Construction

EZ-Drain Tubes

Each section of the tubes are connected to one another by a small channel that allows any condensation to drain completely to the back of the tube and out of our Sure-Lock threaded drain plug.

Stainless Steel Fasteners

Stainless steel fasteners are used to attach the decking to the substructure. These provide a far stronger hold than pop rivets for years of problem free boating.

Robust Construction

This solid frame construction includes a double bolted transom, double solid full risers that are all connected together with double bolted .190 U-bar crossbeams on 2 tube pontoon models or .125 Hat channel crossbeams on 3 Tube pontoon models. We use .250 gauge U-bars at the bow and stern for unbeatable strength.

Triple-protected Tube Design

Our pontoons are divided into three separate compartments and sealed, making them air tight even in the event of a puncture. If the air can't get out, water can't get in.

Wave-Slicing Wide Nose Cones

The wide nose cones deflect spray keeping you dry on the water, while the lifting fins provide the ultimate performance for a smooth ride every time.

Thick Side Protector Keel (3-Tube Models Only)

Our thick side protector keels on the nose cones provide great protection against accidental side impacts at the dock.

Thank you
